

Education

MEng Computer Engineering and Informatics

Thesis (In Progress): Detecting AI-Generated Images on Social Media using Vision Transformers (ViT)

Expected Graduation 2027

Current GPA 7.17/10

Experience

Laboratory Assistant

Logic Design Lab, CEID

Duration: 2023 - 2026

1st EUNICoast Student Festival

Erasmus+ Hackathon programm in Sassari Sardegna, Italy

Duration 21 - 25/9, 2026

Languages

Greek: Native
English: Fluent (C2)

Andreas Kritikos

Computer Engineering and Informatics Student

5th-year Computer Engineering and Informatics student at the University of Patras (CEID), specializing in Big Data. Passionate about Artificial Intelligence, Machine Learning, and Signal Processing. A collaborative team player focused on extracting insights from complex data sets and staying up-to-date with the latest technological advancements

Skills

- **Programming:** C, C++, Java, Python, SQL, MATLAB
- **Core Competencies:** Machine Learning, A.I, Computer Vision, Image Processing, Signal Processing, Data Science, Adaptive Filtering, Data Retrieval, Parallel Processing.

Core Coursework

Specialization:

Machine Learning, AI, Digital Signal Processing, Statistical Signal Processing and Learning, Data Retrieval, Data Structures, Big Data Structures

CS Fundumentals:

Computer Architecture, Systems Programming, OOP, Algorithms, Web Programming, Software Engineering

Projects

- **Thesis: AI - Generated image detection in Social Media**
  (Python, PyTorch)
- **CIFAR-10 ViT & Hybrid Model Comparison**
  (Python, PyTorch)
- **Digital Image Processing (filtering, compression, edge detection)**
  (Matlab)
- **AIoT Movement Categorisation with Time Series Data**
  (Python)
- **Multi-Dimensional Data structures Implementations**
  group project (Python)
- **Data Retrieval Methods Implementations**
  group project (Python)
- **Cyber Attack Analysis and Detection with ML**
  (Python)
- **Airline Managing System**
  group project (Java OOP)
